

Setting the Standard for Innovative Environmental Solutions Since 1987

Environmental Standards, Inc. is a privately held consulting firm specializing in environmental chemistry, consulting geosciences, information technologies, emergency response quality assurance, computational science and health and safety support. Our qualified and experienced professionals apply emerging technologies to address client business challenges associated with managing corporate environmental liability.

Environmental Standards has established a reputation for excellence in meeting and often exceeding client expectations; this reputation has earned us a nationwide client base.

Executive Leadership

Environmental Standards is led by an executive team of highly-experienced professionals who are responsible for the strategic and operational leadership and management of the company.

- Rock J. Vitale, CEAC - Technical Director of Chemistry/Principal

- Daniel P. Claycomb, P.G. - Principal Geoscientist

- Kevin P. Renninger, P.E. - Director of Business Development/Principal
- Stephen D. Brower, P.G. - Director of Geosciences/Principal
- David I. Thal, CEAC - Principal Chemist
- Michael R. Green, Ph.D., MBA, CPEA - Senior Advisor/Principal

History

Environmental Standards experienced rapid growth in the early 1990s, earning honors as one of the Fastest Growing Companies as ranked by the *Philadelphia Business Journal*.

The firm's continued growth was recognized as Environmental Standards was named to the Inc. 5000 list of America's Fastest Growing Private Companies for five consecutive years beginning in 2007.

Our Team

The Environmental Standards technical team is uniquely qualified to offer clients innovative scientific solutions to their environmental problems. Our professionals, recognized experts in their respective fields, are adept at working as independent consultants or as members of large, multi-discipline project teams.

Senior managers have participated in the review and modification of US EPA protocols for environmental sampling,

chemical analysis techniques, health & safety procedures, and Brownfields initiatives. In 2003, Mr. Vitale was appointed to the Environmental Laboratory Advisory Board (ELAB); this federally chartered committee provides private-sector input to the US EPA and the National Environmental Laboratory Advisory Conference (NELAC) relative to NELAC processes and standards for the environmental laboratory community. In 2005, Mr. Vitale was selected to serve on the US EPA Office of Inspector General's Expert Panel on the Evaluation of Drinking Water Laboratory Procedures.

Client-Based Approach

Our client-based approach to consulting means we deliver services in a manner that meets each client's individual business needs. From providing project updates on a convenient schedule to providing project deliverables in customized formats to furnishing invoices that clearly identify project expenses, we make it easy to do business with us. Our clients save time and money while receiving top-quality professional services from experts who know how to guide them through complex environmental compliance processes.
